- In Q3FY18, Motilal Oswal Mutual Fund registered the highest AUM growth of 121% YoY in the MF industry.
- Net yield increased to 0.91% in Q3FY18, despite higher net additions in MFs than in higher-yielding alternatives. This is mainly on account of better pricing power in MF coupled with rising share of direct channel in net sales – up from 13% in Q3FY17 to 31% in Q3FY18.
- SIP inflows during the quarter remained strong – up 33% QoQ. SIP AUM is growing qualitatively and profitably; our average SIP at ~Rs 5,000 per month is much higher than the industry average of Rs 3,500 per month.
- We continue to make investments in brand promotion – up 74% YoY to Rs 71 mn (9% of net revenue) in Q3FY18. This addresses the unique challenge of gaining materiality in a market that is witnessing staggering growth.
- We have a unique distribution strategy of systematic distribution tie-ups with wholesale distributors, which not only keeps distribution costs low, but also minimizes channel conflicts.

**Includes only Open-Ended Equity Mutual Funds

MOAMC – Continuing traction in performance and market share

- Market share in MF Equity Net Sales continued to gain traction at 4% in 9MFY18 vs 2.7% in 9MFY17 in a rising pool of equity flows. This has resulted from MOAMC's niche equity focus, process-oriented (QGLP) approach and solid performance track record.
- Investment performance continues to be robust – our longest-running Value PMS has delivered a return of ~25% per year since inception; F-35, our largest MF scheme by AUM, has delivered 31.4% per year and an alpha over benchmark of 14.3%.
- Most MF schemes (F-25, F-30, F-35) now have a three-year track record, drawing interest from a larger section of distributors and investors.
- MOAMC's Equity MF has the lowest redemption rate in the industry at 21%; the industry average is 47%.
- We have become one of the largest AIF managers in India within a span of two years, with an AUM of Rs 20 bn in 9MFY18 (Rs 3.8 bn in 9MFY17). We have a steady pipeline for fund-raising, with tie-ups already in place.
- ~17% of our non-MF AUM was performance-fee-linked as of December 2017 (13% in FY17). Our target is to increase this further.
- We are seeing initial interest in our offshore products; the offshore segment is 1.7x the institutionally-managed equity assets in India.

- Loan book grew 48% YoY to Rs 49.4 bn, despite slowing down of disbursements.
- During the quarter, AHFCL made accelerated provisions of Rs 66 mn over the regulatory requirements. PCR increased marginally to 31% from 29% in Q2FY18. Plans to take PCR higher in coming quarters.
- GNPA increased from 2.8% in Q2FY18 to 4.6% in Q3FY18 on account of seasoning of book coupled with delay in setting up collection organisation. Further, prolonged impact of external shocks in the economy also affected asset quality. Impact of collection organisation is yet to be reflected in asset quality.

- Average ticket size is Rs 0.9 mn, with loans extended to more than ~57,000 families, as AHFCL is focused on the affordable housing segment. Average LTV of the book is <59%; overall FOIR remains at a comfortable level of 46%.

- New branches added in new states in FY17 contributed 25%+ of total disbursements in 9MFY18.
- Direct channel contributes 80%+ of loan sourcing.
- Investments have been made in building a collection and legal organisation, while calibrating growth. This will create a strong foundation for sustainable growth.
- Margins stood at 3.85% in 9MFY18 versus 3.35% in 9MFY17. However, in Q3FY18, it was impacted on account of QoQ decline in yield led by interest reversals.
- Average cost of borrowing declined from 9.8% in Q2FY18 to 9.7% in Q3FY18, despite negligible CP contribution in funding mix.
- Diversified liability profile, with ~53% from NCDs and ~47% from bank loans as of December 2017. 28 banks extended credit lines and NCDs were allotted to 24 institutions as of December 2017.
